PILLAR · THE FRAMEWORK

Patient Experience, run on LastStop

What the patient sees, from the front door to the refill.

- SeeMyVitals is a telehealth practice brand shown on LastStop. The wordmark and palette are a placeholder made for this demo.
- Nine screens a patient meets: the front door, the program page, intake, the treatment dashboard, prescriptions, messages, billing, the phone, and the skins.
- Every screen is from a local demo build with one labelled sample patient. No patients, orders, revenue or certifications are claimed.
- Where a vendor is not connected, the page says so. Nothing is filled in to look finished.

[→ The patient side of SeeMyVitals](#)[SAMPLE data throughout](#)[Nothing live with patients](#)[02 The front door](#)[04 Eligibility and intake](#)[05 The treatment dashboard](#)[06 Prescriptions and refills](#)[07 Secure messages](#)[08 Billing, stated plainly](#)

02 LASTSTOP

The front door

→ Physician review required, stated first

⚙ One button: Start Free Assessment

⚙ Pharmacy not configured, said plainly

LIVE IN DEMO • SAMPLE DATA

- The badge above the headline: physician review required, eligibility not guaranteed.
- Prescriptions, if issued, follow clinician review. Shipping depends on a configured pharmacy partner.
- The offer below says membership is clinician review and support; medication and shipping apply only if a clinician prescribes.
- Returning patients sign in from the top bar. In the demo, the same bar links to the operator console.

The first line a patient reads: a clinician decides, and eligibility is not guaranteed.

METABOLIC RESET PROGRAM

Eligibility and intake

Drafts save in this browser. Step 1 of 7.

Compounded medications are prepared by a licensed pharmacy for an individual patient. They are not FDA-approved, and the FDA does not review them for safety, effectiveness or quality. A licensed clinician decides whether one is right for you.

This is not for emergencies. If you have chest pain, trouble breathing, a severe allergic reaction, suicidal thoughts, or any other emergency, call 911 or go to the nearest emergency department. Do not use this form, chat, or reporting link for emergency care.

This browser stores this session's intake and chart in this browser only. It is not a production HIPAA environment. Do not enter real identifiers belonging to someone else.

⚙️ Emergency notice before the form

⚙️ State is a dropdown

LIVE IN DEMO · SAMPLE DATA · QUESTION CONTENT NEEDS CLINICIAN AND COUNSEL SIGN-OFF

≡ Eligibility, state, age

- Eligibility, history, uploads, identity, consent, payment, review.
- Step 1 confirms the program, where the patient lives and their age. State is a dropdown, not free text.
- Before any field: this is not for emergencies; call 911 or go to the nearest emergency department.
- The compounded-medication disclosure opens the form.
- The demo keeps the intake in this browser and says so: it is not a production HIPAA environment.

Seven steps, and the first one asks where the patient lives.

Prescriptions and refills

→ Four pharmacy steps, all waiting

⚙ Request refill

⚙ A dose change is a message, not an order

DEMO CONNECTION — AGREEMENT PENDING

≡ Order and refill gates

- The order is held until a prescriber approves the case. The page says so above the steps.
- Received, compounding, shipped and tracking each show their state. All four wait, because there is no prescription yet.
- Hallandale Pharmacy is a demo connection: no agreement is signed and nothing is sent.
- A dose-change request goes to the clinician as a message. It never edits the prescription.

Nothing goes to the pharmacy before a prescriber approves.

METABOLIC HEALTH

Metabolic Reset Program

Physician-supervised metabolic care with structured intake, review, and refill loops.

Compounded medications are prepared by a licensed pharmacy for an individual patient. They are not FDA-approved, and the FDA does not review them for safety, effectiveness or quality. A licensed clinician decides whether one is right for you.

COMPOUNDED PRESCRIPTION

IDENTITY REQUIRED

COLD CHAIN

A structured care path for patients seeking physician-directed metabolic support. Qualification, intake, provider review, pharmacy routing, shipment tracking, support, and renewal are handled as one workflow — not a storefront checkout.

FDA status

Compounded medications in this program are not FDA-approved. They have not been reviewed by FDA for safety, effectiveness, or quality as compounded products. They are not the same as a branded FDA-approved drug.

Boxed warning

No boxed-warning text is on file for this program. A clinician and counsel must supply labeled-use language before this block can be filled. This slot is empty on purpose.

[FDA disclosures](#)

What the membership fee includes

- provider review
- support
- refill workflow

03 CLAIMRIGHT / COMPLIANCE

The program page

→ FDA status in its own box

⚙️ Boxed warning left empty on purpose

⚙️ Identity required, cold chain

LIVE IN DEMO · SAMPLE DATA · DISCLOSURE TEXT NEEDS COUNSEL SIGN-OFF

- Metabolic Reset Program: physician-supervised metabolic care with structured intake, review and refill loops.
- Compounded medications are not FDA-approved. The page says so in the opening lines and again in its own box.
- The boxed-warning slot stays empty until a clinician and counsel supply the labelled-use text.
- Tags show what the program needs: a compounded prescription, identity checks and cold-chain shipping.
- The membership fee covers provider review, support and the refill workflow.

The FDA status sits on the program page, not in the small print.

Cases 1 on file

05 LASTSTOP

The treatment dashboard

→ Care status: awaiting review

⚙ Identity: not started, and why

⚙ Held: pharmacy not connected

LIVE IN DEMO · SAMPLE DATA

- One sample patient: plan, prescription, next appointment, lab flags, identity, care status and cases.
- Nothing is dressed up: no clinician assigned, no decision, no prescription yet.
- Identity checks cannot run until a vendor is connected, so compounded checkout stays gated. The button records a blocked attempt.
- Video visits are still being connected, so no appointment is shown.
- The chart lives in this browser in the demo, and the banner at the top says so.

Where the case stands, in plain words: awaiting clinician review.

SAMPLE data: every screen runs on one labelled sample patient in a local demo build.

Demo connection — agreement pending: Hallandale Pharmacy is shown in the demo only. Nothing is sent to it. The payment processor and the identity vendor are not connected.

No patients, orders, revenue or certifications are claimed. LastStop never prescribes or dispenses.

SeeMyVitals wordmark and palette are a placeholder brand made for this demo, not the final brand.
